

Experience from CBIT proposals already presented to GEF - Ghana

Project Title : Strengthening Ghana's national capacity for transparency and
ambitious climate reporting

By:

Samson Botchway

Programme Officer,

E.P.A. , Ghana

Setting up the proposal

2015

- GEF launched CBIT

August 2016

- Concept Idea Submitted to UNEP

May 2017

- **GEF-6 Project Identification Form (PIF) submitted**

May 2017

- Preparation Grant Approved

June

- Draft CEO Project Grant Document prepared

Outputs

1.1 An effective institutional arrangement to plan, implement and report climate action established

2.1 A centralized national infrastructure for improved data access and information management established

3.1 Five climate change indicators mainstreamed into Ghana's Medium-term framework

4.1 Piloting of domestic transparency framework (MRV) in Energy and Transport sector

Why Recommend CBIT

- Way to increase domestic efforts on transparency action
- Help build a culture of climate reporting using the government approach thereby deploying the entire government machinery to climate report to be able to scale up awareness and capacities among line ministries
- CBIT is the simplified way of getting additional direct resources to boost the functionality of domestic MRV system
