

Gender sensitive study on heating consumption patterns: sharing experience from North Macedonia

Tuesday, August 25th 13:00h (Tashkent time)

Background:

This webinar is organized by UNDP/UNEP GSP programme as part of a series of trainings organized on the topic of integrating gender into climate policies and reporting in Central Asia, which include:

- [May 20, 2020: an introductory webinar for Central Asia](#), which provided general outlines and requirements on mainstreaming gender into climate reporting; introduction to the concept of gender analysis and gender action plan.
- **August 25, 2020: a regional webinar for Central Asia**, this webinar, aimed at providing concrete and practical examples taken from North Macedonia's gender sensitive case study on heating consumption patterns.
- **September 2, 2020: a regional virtual workshop for Central Asia and Europe** (hosted by UNFCCC) to share relevant case studies, examples and lessons learned on the results, impacts and main challenges in integration of gender into national climate policies, plans and strategies.

Objective:

The main objective of the webinar is to further support knowledge sharing on the integration of gender and climate policy and reporting by introducing concrete and practical examples from other countries. This time, the countries of Central Asia will hear about North Macedonia's experience to conduct a gender sensitive study on heating consumption patterns.

Agenda:

Introduction to the webinar

Nailya Mustaeva, MRV Coordinator in Central Asia

North Macedonia's study on gender sensitive heating consumption patterns

Ms. Olgica Apostolova, University of Information Science and Technology

Discussion and Q&A Session

The webinar will be **in Russian and English** (simultaneous translation will be provided) and will last **1 hour**.
